June 14, 2019, 12:00 p.m. - 1:00 p.m. EDT

Twitter Hashtag: #ASAwebinar

Preparing a successful National Science Foundation (NSF) CAREER proposal can be a daunting task, especially since only a maximum of three submissions is allowed. I will share my own experiences with this process. Specifically, I will outline the failures of the first submission, the value of preparing the best you can every time, and learning from an unsuccessful proposal. Then, I will share how all these helped me prepare a successful proposal.

More information about resources for graduate students and funding opportunities more generally is available at www.amstat.org/ASA/Your-Career/External-Funding-Sources.aspx, a web page of the American Statistical Association maintained by the ASA Committee on Funded Research.

Ana-Maria Staicu is associate professor in the department of statistics at North Carolina State University. Her research interests are primarily in functional data analysis, longitudinal data analysis, nonparametric statistics, and brain imaging analysis with applications to brain tractography studies of MS, wearable computing, animal studies, and environmental studies. She is a recipient of an NSF CAREER Award.
